

Lone Star Park New Entry Policy

The following new entry requirements will be in place beginning on Monday, July 26, 2010. This policy is for all horses shipping into the stable area of Lone Star Park regardless of their origin.

A negative Piroplasmosis cElisa test for Theileria equi and Babesia caballi that has been performed in the last year will now be mandatory.

Horses currently stabled on the grounds will also have to provide negative tests to the racing office no later than Wednesday, August 4, 2010.

And as usual you must also provide the stable gate a negative Coggins test within the past twelve months and have a valid health certificate dated within 45 days when entering the stable area.
