Official Ruling # SHRP4668

Supplement # 1

03/04/2014

The Texas Veterinary Medical Diagnostic Laboratory (TVMDL) has informed the Texas Racing Commission that it found a discrepancy in the phenylbutazone testing conducted from October 7, 2013, through December 3, 2013. Consequently, TVMDL no longer supports any phenylbutazone positives it reported from tests conducted during this period of time. In addition, due to degradation of the samples TVMDL retains from earlier phenylbutazone positive tests, TVMDL is unable to retest those samples and verify that they were in fact positive.

As a result of this information, Executive Director Trout has rescinded all affected rulings issued by the Commission, including this ruling. It is the intent of the Commission that the original determination should be disregarded by all racing jurisdictions and that the licensee should be regarded as innocent of the alleged violation.
